EXPERIENCE

Assistant System Engineer   July 2018 - Sep 2019
Tata Consultancy Services   *Bengaluru, KA*

- Spearheaded the design and development of internal applications for TCS and esteemed clients, including TCS' e-learning portal, FrescoPlay, and their team collaboration app, FrescoTalk, comparable to Slack.
- Utilized Agile and Scrum methodologies to enhance project efficiency and accelerate development, effectively prioritizing tasks to achieve streamlined results.

Application Development Analyst   Mar 2021 - Aug 2021
Accenture   *Bengaluru, KA*

- Contributed significantly to the front-end development of healthcare applications using React, playing a pivotal role in enhancing the usability and performance of critical medical platforms.
- Collaborated with cross-functional healthcare teams to translate design mockups and user requirements into fully functional and visually appealing React-based interfaces, delivering seamless user experiences.
- Demonstrated expertise in front-end technologies and React frameworks, implementing modern UI/UX practices, and adhering to strict data security and privacy regulations in the health sector to ensure the confidentiality of patient information.

Assistant Manager   Oct 2022 - Present
Waycool Foods and Products   *Bengaluru, KA*

- Proficiently served as a Frontend Developer, leveraging React and Bootstrap to design and implement intuitive user interfaces for diverse portals, including admin, distributor, logistics, and call center applications.

PROJECTS

GARUDA - DMS (DISTRIBUTOR PORTAL) .

The Application is built using ReactJs and Node. It is used by distributors for setting order-related configurations, placing orders on behalf of customers, and creating salesmen mapped to managers. The modules closely adhere to the given Figma design. A settings module was developed, incorporating multiple API calls within the same screen and managing independent loading states using JavaScript and React JS.

Admin Portal.

The admin portal built using React is a powerful web application designed to facilitate the management and administration of various aspects of the system. Its primary purpose is to empower administrators with the necessary tools and functionalities to efficiently handle user management, employee management, customer management, and order processing, while also granting access control to different portals.

EXTRA-CURRICULAR ACTIVITIES

- Reading,Writing,Running,Travelling

CERTIFICATES

MERN Full Stack Developer – DCT Academy
